

CONSULTATION MANAGER

in the ENERGY SECTOR

AGL is one of Australia's leading integrated energy companies and largest ASX listed owner, operator and developer of renewable energy generation in the country. Key works include the **\$570m Diamantina Power Station**, the **7-year \$795m Camden Gas Project**, and the **Hunter Gas Project** - the decommissioning of gas wells and seismic monitoring bores in a thriving tourism district.

Acciona is a world leader in renewable energy and infrastructure. CM is used to manage risk and measure KPIs to ensure on-time and within budget project delivery. Information is shared accurately across remote teams and contractors on projects such as the **\$147m Gunning Wind Farm**.

Energex owns and operates the electricity distribution network in South East Queensland. CM is used as a risk mitigation tool by teams and contractors, managing data across infrastructure and maintenance works. Projects include the sensitive **110kV, 23km Kingston to Jimboomba** network upgrade project.

Trustpower is a renewable energy generator and electricity retailer with 34 power stations throughout New Zealand. CM is used to manage community consultation activities, building stakeholder confidence across sensitive projects. These include the **109-turbine Rye Park Wind Farm** and the **\$700m Sanderston Wind Farm**.

Transgrid manages New South Wales' high voltage electricity transmission network. CM provides a comprehensive record of confidential government liaison, stakeholder interactions, and media activity. CM also manages community partnerships, tracking applications and sponsorship budgets. Recent projects include the **123kV Manildra to Parkes** high capacity transmission line.

Hydro Tasmania is Australia's largest producer of renewable energy and an innovator in renewable energy technologies. CM is used to maintain positive relations with numerous stakeholders in government, media and the community on projects including the **56-turbine, \$394m Musselroe Wind Farm**.

The Department Mines and Energy administers and regulates energy tenure and energy activities in the Northern Territory. CM is used to maintain positive community sentiment about major policy initiatives, like the **Hydraulic Fracturing Inquiry**, which received hundreds of public submissions.
