The Sunshine Coast University Hospital, under construction since 2012, will open in 2017 as a **450 bed public tertiary teaching hospital**. CM has been used to maintain relationships with stakeholders and key regulators throughout the project to ensure legislated compliances are met. Infrastructure upgrades are being delivered through a **\$1.8b** partnership with **Bovis Lendlease**.

Caboolture Hospital provides a range of health care services in its **216 bed facility**. The hospital has built a comprehensive database of patient after-care service providers and suppliers in CM. This information helps match patients with the right services so that they can continue to receive the care they need once discharged.

Metro North Hospital and Health Service provides public healthcare through the area's five hospitals and allied services in North Brisbane. CM is used to manage community consultation in the implementation of major projects, including the new masterplan for the **Brighton Health Campus** which will provide more than **200 beds** for **community transition care, rehabilitation and residential aged care**.

New South Wales Ministry of Health is the government department for public healthcare in NSW. '**Rebuilding NSW**' is a **\$5b initiative** to improve health facilities and services across the state. CM is used to manage consultation with community and regulators at a local, state and federal level. **17 sites** across NSW are undergoing capital works, including the **\$1b Northern Beaches Hospital**.

QLD Health is Queensland's Government Department for public health and wellbeing. CM is currently being used to manage key internal stakeholders as part of a change management initiative in the roll out of **Patient Safety and Quality Improvement Service project**. QLD health can quickly report from CM to demonstrate compliance with the **National Safety and Quality Health Service Standards**.
